EXPERIENCE

The Home Depot

Atlanta, GA

Finance & Strategy Manager, Supply Chain Finance

May 2021 – Present

- Developed and operationalized labor forecast bias analysis leading to \$10M annual savings
- Led collaboration and modelling effort with various cross-functional stakeholders for long range financial model of warehouse automation (\$8M annual savings) and labor insourcing (\$5M annual savings) initiatives and achieved executive team approval
- Built multi-site NPV analysis template used by broader team for numerous business cases (100+ hrs/yr productivity savings)
- Initialized and facilitated monthly Supply Chain Finance team (60+ members) technical training to catalyze group knowledge share and relationship development in virtual environment

Finance Project Leader, Supply Chain Finance

Feb 2020 – May 2021

- Acted in FP&A role owning all aspects of HD Pro delivery P&L; worked with senior director of Ops, her reports, and other business partners to drive planning, forecasting, supply chain strategy, ad-hoc analytics, reporting, and month end close
- Increased engagement and accountability in actionable cost reduction/risk mitigation opportunities through revision of monthly business review deck to focus conversation on volume, rate, and operational metrics (recognized as critical by EVP of SC)
- \$1.2M savings achieved after collaborating with business partners to determine Q2 transportation cost savings initiatives and then driving results through detailed weekly tracking of each initiative

McKinsey & Company

Atlanta, GA | Houston, TX

Business Analyst

Aug 2018 – Feb 2020

- Identified +\$100M/yr savings opportunity in restructuring support organization of oilfield services firm using excel modeling; persuaded executive committee to act; helped client create implementation plan to achieve savings in accelerated timeline
- Discovered \$6M/yr margin increase opportunity through change in B2B pricing strategy at food processing corporation
- Achieved \$10M/yr reduction in procurement spend by leading eRFX events at heavy industrial equipment manufacturer
- Coached power plant employees to identify and execute \$2M/yr reduction in external spend

Blue Raven Solar

American Fork, UT

Data Scientist

Jan 2018 – Aug 2018

- Created automated tool to gather, synthesize, and interpret data from four disparate platforms using Python; enabled company to monitor individual performance relative to production guarantee (deemed a “mission critical” by executive team)
- Automated invoice verification process; \$100,000 one-time savings; similar carryforward savings expected by CFO
- Coded program in two days to extract W2 and 1099 documents from bulk files and sent to all employees and contractors

Operations Intern

Jun – Dec 2017

- Increased corporate workforce by 10% in two-weeks; recruiting analysis during process saved \$40k in future recruiting efforts
- Created and initiated a corporate-wide CO₂ reduction initiative, projected to reduce company CO₂ output by 37.5 tons a year

Africa International Business Project

Lilongwe, MALAWI

Intern

May 2017

- Collaborated with Malawian entrepreneurs to create potential for soap business to increase their income by 75%
- Organized and implemented living documentation system for all projects, freeing 250 hours of prep time for future interns
- Met local entrepreneurs in South Africa, Malawi, and Zambia to discuss nuances of running business in region

Valero Energy Corporation

Memphis, TN

Control Systems Engineering Intern

May 2016 – Aug 2016

- Created 3,000-line VBA statistical analysis program to continually improve 29 Advanced Process Control models
- Coordinated with numerous coworkers to create 25+ graphic displays with vital safety and environmental impact data
